

MMR Project List

Project Number	Project Name	Public Location	Public Description	Field Costs per Person	Start Date	End Date
0005	Health Awareness Clinics	Middle East	The Southern Baptist Society reaches out to the people of the area in community development projects. We hope to build better relations by showing them the love of Christ through healing hands.	Costs are around \$2500 per person. There is a \$1000 project fee plus airfare, which averages around \$1500. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	02/16/2009	12/31/2009
0009	Dental and Radiology Volunteer Teams	Horn of Africa	2 week Dental and Radiological trip in the Horn of Africa. We are currently working to develop a comprehensive medical strategy in the Horn of Africa among one of the most unreached people groups in the world. These teams will help give access and credibility to our involvement in local communities at a medical level.	Costs are around \$3200 per person. There is a \$1500 project fee plus airfare, which averages around \$1700. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	10/03/2009	10/17/2009
0013	Desert Dental Project	North Africa	Dentists are needed to help carry out the strategy of opening new areas. A public health team currently working in the area and desires a dental team for help with ongoing work. A team is desired for at least two weeks any time from early August through November, 2008.	Costs are around \$3300 per person. There is a \$1300 project fee plus airfare, which averages around \$2000 (three flights). The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	01/01/2009	12/31/2009
0014	Desert Eye Clinic	North Africa	An eye clinic is needed to help carry out the strategy of opening new areas. A public health team currently working in the area and desires an eye clinic team for help with ongoing work. A team is desired for at least two weeks any time in 2009.	Costs are around \$3300 per person. There is a \$1300 project fee plus airfare, which averages around \$2000 (three flights). The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	02/16/2009	12/31/2009
0015	Saharan Desert Clinics	North Africa	Any primary care doctors (dentists, pediatricians, internists, FP's, OB/Gyn, and GP's) are wanted to conduct mobile village clinics. Nurses, pharmacists, and other allied health professionals are welcome as well. The team will conduct one clinic per village per day, with possibly over 100 patients each day. Days could be long and strenuous. Through these clinics, doors and relationships will be opened in many villages through which the gospel can flow. It is hoped that many will come to Christ and a new church will be started in each village where a clinic is provided. Notes: This is a warm, desert region.	Costs are around \$3300 per person. There is a \$1300 project fee plus airfare, which averages around \$2000 (three flights). The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	01/01/2009	11/30/2009
0031	Medical Clinic in China	East Asia	A medical clinic will enable the team to have access to segments of the population for training, evangelism, and church planting. You will be asked to work alongside long-term personnel and national believers in a multi-day clinic to reach out to the local population.	Your original fee paid to MMR will cover visas, food, hotels, and transportation to and on the project site. You will need extra money for souvenirs, snacks, gifts and if there is any sight seeing, that will also come out of your pocket.	09/12/2009	09/25/2009
0033	Academic Lectures in China	East Asia	Lecturers in any specialty are welcome to come build relationships and share current techniques with national professionals.	Your project fee paid to MMR will cover visas, food, hotels, and transportation to and on the project site. You will need extra money for souvenirs, snacks, gifts and, if there is any sight seeing, that will also come out of your pocket.	06/01/2009	11/30/2009
0037	North Africa Village Medical Clinics	North Africa	Any primary care doctors (dentists, pediatricians, internists, FP's, OB/Gyn, and GP's) are wanted to conduct mobile village clinics. Nurses, pharmacists, and other allied health professionals are welcome as well. The team will conduct one clinic per village per day, with possibly over 100 patients each day. Days could be long and strenuous. Through these clinics, doors and relationships will be opened in many villages through which the gospel can flow. It is hoped that many will come to Christ and a new church will be started in each village where a clinic is provided. Notes: This is a warm, desert region.	Costs are around \$3000 per person. There is a \$1200 project fee plus airfare, which averages around \$1800. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	02/16/2009	11/30/2009
0038	North Africa Village Medical Clinics	North Africa	Any primary care doctors (dentists, pediatricians, internists, FP's, OB/Gyn, and GP's) are wanted to conduct mobile village clinics. Nurses, pharmacists, and other allied health professionals are welcome as well. The team will conduct one clinic per village per day, with possibly over 100 patients each day. Days could be long and strenuous. Through these clinics, doors and relationships will be opened in many villages through which the gospel can flow. It is hoped that many will come to Christ and a new church will be started in each village where a clinic is provided. Notes: This is a warm, desert region.	Costs are around \$3000 per person. There is a \$1200 project fee plus airfare, which averages around \$1800. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	02/16/2009	11/30/2009
0039	Rural Clinics	South Asia	Any primary care doctors (dentists, pediatricians, internists, FP's, OB/Gyn, GP's, FNP, and PA) are wanted to conduct mobile village clinics. Nurses, pharmacists, and other allied health professionals are welcome as well. The team will conduct one clinic per village per day, with possibly over 100 patients each day. Days could be long and strenuous. Through these clinics, doors and relationships will be opened in many villages through which the gospel can flow. It is hoped that many will come to Christ and a new church will be started in each village where a clinic is provided. Any two week time period a team is welcome.	Costs are around \$3000 per person. There is a \$1200 project fee plus airfare, which averages around \$1800. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements.	06/01/2009	12/31/2009

MMR Project List

				arrangements.		
0040	Continuing Education for General Physicians	Middle East	Rural national general physicians need help improving their clinical diagnostic and treatment skills. A few general lectures then hands on training in use of equipment and/or treatment of patients in their setting. Health Centers have some fairly new equipment but little instruction in use. Need Radiologist to train in use of Ultra Sound equipment and interpretation of images in three villages. Need Internist to train in use of defibrillator and ventilator; small town hospital has ICU equipment but staff doesn't know how to use it. Treatment protocols for hypertension, thyroid disorders, etc simple management and referral. Need Orthopedist to help in treatment of outpatient muscular skeletal pain, deformities, osteomyelitis, etc. Need Dermatologist to train physicians as well as nurses and midwives to recognize and treat common skin conditions.	Costs are around \$2500 per person. There is a \$800 project fee plus airfare, which averages around \$1700. The project fee covers visas, medications for clinic use, translators, field transportation, field room and board, and logistics arrangements	02/01/2009	12/14/2009
